

## Warning Of Frost

Weather men warned growers here to be on the look-out for frost tonight.

The weather bureau said frost is likely tonight, with lows possibly between 27 to 34.

It also predicted a high of 42 to 50 today under clearing skies. Wednesday should be mostly sunny and not so cool.

The Thursday outlook is showers or thundershowers and warmer.

Winds today should register 18 to 25 miles an hour, the weather bureau said, from the northwest to west. They are expected to diminish rapidly this evening.

### GROWERS ON ALERT

Growers have been on the alert for frost for the past several weeks and some have ignited frost-fighting devices in their orchards in recent days when the temperature dropped towards the mid-20s.

Some tart cherry buds were killed.

Frost will continue to be a danger to area tree and row crops for several weeks as they approach and pass the blossom stage of fruit development. Last year, a series of frosts in May caused millions in damage to crops here despite grower frost-fighting efforts.

Berrien Extension Fruit Agent Harvey Belter said area fruit tree blossoms probably can stand a freeze tonight down to 25 to 28 degrees, depending on location.

But he predicted growers will be irrigating strawberries, whose buds emerged recently and are vulnerable.

**AFTER THE JUMP:** Sgt. 1/c Herbert J. Huston of Ft. Benning, Ga., puts a street shoe on his artificial leg after jumping with the Ft. Benning Sport Parachute Club during the weekend. Huston, who lost his right leg to a Viet Cong booby trap in 1965, has asked authorities to include military parachuting as part of his normal duties. (AP Wirephoto)

## SAYS FOUNDATION SQUANDERED HALF MILLION DOLLARS!

### New Oil Threat On East Coast

Slick 30 Miles  
Long Sighted

BOSTON (AP) — Two large oil slicks skimming over Atlantic waters threatened the entire Massachusetts coastline today with deposits similar to those which blackened 40 miles of Cape Cod beaches during the weekend.

The Coast Guard said helicopter observations indicated that one patch extended for 30 miles from the Boston lightship outside Boston Harbor southeastward to Race Point at the northern tip of Cape Cod, near Provincetown.

The other was described as a "large, pie-shaped area" 20 miles long and headed toward Chatham on the southeast corner of the Cape.

State civil defense officials alerted communities from Gloucester on the shore north of Boston to Hull on the south shore to be ready to fight the heavy crude oil should it strike their beaches.

The source of the oil was not known.

Some officials suggested it might be from a tanker which was sunk off the New Jersey coast during World War II and ruptured last week, but others said oil from the tanker could not have made the 300-mile trip to the Cape in a few days.

Stanley Johnson, superintendent of the Cape Cod National Seashore, estimated it would take two to three weeks to clean away the oil which struck beaches along the eastern shore of the Cape from Provincetown to Chatham Sunday.

"The condition is serious, but as far as I know it won't put us out of business for the summer," he said.

### Only \$498 Left, Kelley Charges

LANSING (AP) — Assets of a Battle Creek foundation, once worth more than a half million dollars, were "wasted and squandered", Atty. Gen. Frank Kelley charged in a suit today.

Kelley brought suit against the officers and directors of the Race Betterment Foundation, a nonprofit charitable organization.

Under the act, the attorney general has responsibility to institute proceedings to secure the proper administration of any charitable trust.

peated requests. No annual reports have been filed since then as required by the Charitable Registrations Act, Kelley said.

The attorney general charged that assets valued at more than \$687,000 in 1947 were "wasted and squandered" leaving approximately \$498 at last report.

Kelley asked the Ingham County Circuit Court to remove officers and directors of the foundation, to determine their personal liability, appoint a receiver and appoint new officers and directors.

**CREATED BY KELLOGG**  
The foundation was created in 1906 by the late Dr. John H. Kellogg of Battle Creek, co-founder of the W.K. Kellogg Cereal Co. He died in 1943 at the age of 91.

The Race Betterment Foundation was set up for general charitable, benevolent and educational purposes and has no connection with the question of race as it is used in its modern context, Kelley said.

Kelley said the trust instrument originally creating the foundation, as well as Dr. Kellogg's will and the articles of incorporation, all provided that only the income of the foundation should be spent.

The suit alleges that in direct violation of these provisions the principal assets of the foundation were spent, "indeed, completely squandered."

**SUIT CHARGES**  
The suit also alleges that in 1956 some \$200,000 of the foundation's funds were transferred to a Florida entity alleged to be a nonprofit corporation, and that in 1959 the corporation's assets were conveyed to one of the foundation's directors and officers. The person was not named.

The suit further alleges that the children of two of the officers and directors of the foundation were given college scholarships in excess of \$5,000 each.

Kelley claimed in the suit that these and other acts of the defendants were in direct violation of the legal duties and responsibilities of the officers and directors of the foundation.

Kelley said the trust was registered in 1965 only after re-

### Dinner In Bad Taste, Says Labor

Architects Event  
Held At Capitol

LANSING (AP) —The state AFL-CIO Monday branded a Michigan Society of Architects dinner for the Legislature "in bad taste."

William Marshall, union executive vice president, objected because the architects held their buffet dinner in the State Capitol Rotunda. The dinner was last Thursday.

Part of the purpose of the gathering was to allow the architects to inspect the Capitol.

Several plans, to either raze the Capitol to make way for a new building, or to keep it as a historic monument are under consideration by state officials.

"I personally think the entire affair was in bad taste and was an arrogant misuse of public facilities," Marshall wrote.

Marshall sent copies of his letter to Gov. George Romney, other top state officials, key legislators and State Property Manager John Gafner.

### Little Boy Killed When Hit By Car

MARK LYNDON HILL

The three-year-old son of an Andrews university business office employee was killed yesterday when hit by a car as he crossed South George street toward his home at Berrien Springs.

The boy, Mark Lyndon Hill, son of Mr. and Mrs. Kendall Hill, 112 South George street, had been playing on a neighbor's lawn and suddenly ran toward the street and out in front of a car, Berrien Sheriff's Deputy Eugene Ekiund said.

The accident happened in residential area at the northwest edge of Berrien Springs, bordering on Andrews university campus. Most of the area is occupied by university employees. The boy's father is an accountant in the university business office and his

### New Mayor Of Allegan

ALLEGAN — An Allegan high school teacher, James Rolfe, was elected by fellow councilmen Monday evening to serve as Allegan's new mayor. Rolfe succeeds C. J. Smith who served one year.

Donald Foster, newly-elected councilman, was elected mayor pro-tem.

### Murch Receives Agriculture Award

Honored By Frozen Food  
Packers At Banquet

By BRANDON BROWN  
Staff Writer

Thirteen is a lucky number for Andrew Ford Murch, Murch, 60, president of the A. F. Murch Co. of Paw Paw and dean of concentrate fruit juice processors in the nation, last night became the 13th recipient of the annual agricultural award presented by the Michigan Frozen Food Packers association at a banquet in the Berrien Hills country club, Fairplain.

Besides the processor award, Murch received resolutions of commendation from the Michigan Legislature, presented by 54th Dist. Rep. Edison Root (R-Bangor), head of the House agriculture committee, and from Agriculture commission, presented by Agriculture Director B. Dale Ball.

Some 300 fellow processors, growers and others connected with the agriculture industry attended.

Murch said Grace, his wife of

38 years, and the skilled staff of his firm deserve the credit.

**EARLY START**  
Murch exhibited "executive ability" by operating a muskrat trapping line at the tender age of 8, said processor award

recipient Murch in a humorous recap of some of the early episodes in Murch's life.

As a lad, Murch also dabbled in hog raising and green pepper

### School Tax Approved In Covert

One Mill Hike  
For One Year

COVERT—An increase in the operational millage for Covert schools from 7 to 8 mills for one year passed by a margin of 28 votes in the special election held Monday.

Dr. Lewis Wood, superintendent of the Covert school system, said the extra mill was requested to meet increased overall expenditure anticipated during the coming year.

A total of 144 votes were cast with 86 residents voting yes. There were 58 votes cast in opposition to the proposal.

Emery Crawford, secretary of the Covert school board, commented that there are usually 57 votes cast against any millage for the schools. An absentee ballot cast this year brought the total votes against the proposal to 58. District voters have approved millage requests annually in recent years.

After much shouting back and forth through the two heavy glass doors, Fernandez returned to his office and tossed the tax forms out the window to the policemen.

Attached was a hastily scribbled note: "Thank you very, very much."

The patrolmen mailed the

### Whirlpool Veep Tells Retirement

R. L. Evans  
Will Leave  
On June 1

Robert L. Evans, group vice president, Whirlpool Corporation today announced his decision to retire effective June 1, 1967.

Evans joined Whirlpool as assistant to the general manager of LaPorte (Ind.) Aircraft Division in 1951. Since that time he has served the company as general manager of the LaPorte Division and the Clyde (Ohio) Division as vice president, personnel, having been elected by the board of directors in November, 1956.

In 1962, Evans was appointed vice president of the new TECTROL Division. During this assignment this new system, developed to prolong the freshness of produce, was introduced to important U. S. markets, and in Europe, Australia and Japan.

In February, 1965, he was elected to a new Whirlpool position as group vice president, with group responsibility for TECTROL, personnel, customer service assurance and public relations.

Elisha Gray II, Whirlpool chairman, and John Platts, president, said: "We fully understand Mr. Evans' decision. He has served this corporation brilliantly for 15 years, and the results of his many fine accomplishments speak for themselves."

Prior to his association with Whirlpool, Evans worked for the Glenn L. Martin Company in Omaha, Neb., and Baltimore, Md.

From Indianapolis, Ind., Evans attended schools in Ohio and received his industrial engineering degree from the University of Cincinnati in 1935.

Commenting on his retirement from active corporate life, Evans said:

"I know that Whirlpool is a great company with which to be associated. Since my early days in personnel work, I have realized the importance of retirement planning. In my case, such planning now provides me with the opportunity to pursue private interests."

Mr. and Mrs. Evans reside at 258 Hightman Park, Benton Township.

ROBERT L. EVANS

### JUDGE RULES

### Pregnancy No Immunity To Jail Term

CEDAR RAPIDS, Iowa (AP) — "Pregnancy cannot be allowed to become a sanctuary for illegal activities," a judge has ruled in turning down a request by a woman prisoner for a writ of habeas corpus to win freedom for her unborn child.

Mrs. Richard Schnor, 26, Cedar Rapids, jailed here since March 15 for parole violation and passing a false check, contended she was pregnant and that authorities were holding her unborn child illegally.

The prosecution retorted it was Mrs. Schnor — not the sheriff — who was holding the child and they would gladly release the infant if Mrs. Schnor would produce it.

District Judge William R. Eads said Monday if he granted the writ, it would set a precedent that could result in freedom for major female criminals if they were pregnant.

Mrs. Schnor, mother of three children, was ordered by the judge to finish her term for forgery in the Iowa Women's Reformatory.

### Congressman In Hospital

WASHINGTON (AP) — Rep. Jack H. McDonald, R-Mich., entered Bethesda Naval Hospital Monday with a herniated intervertebral disc, aides reported.

McDonald is expected to be in traction for one week with the back injury. He first injured his spine about one year ago and suffered a relapse this weekend while on a speaking trip to Connecticut.

## 'Air' Mail Beats Tax Deadline

NEW YORK (AP) — Raymond Fernandez, 44, a partner in a lower Manhattan textile firm, worked late Monday night in his fourth-floor office.

As he closed his office door at 8:15 p.m. he was weary but looked back upon a long day with a sense of accomplishment. He had completed his three tax returns about noon and

spent the rest of the afternoon and evening catching up on work and writing letters.

The three forms — federal, state and city — were in his pocket as he walked toward the front door of the building. Fernandez planned to drop them in the first mail box he passed, well before the midnight deadline for filing.

But the building door was locked.

Fernandez reflected: There would be no custodian in the building until morning; the mail was not picked up until the start of the business day; and there were no other doors to try. He called police.

At 9:10 p.m. Patrolmen Joseph Sarlo and Anthony Zullo

arrived at the building entrance.

After much shouting back and forth through the two heavy glass doors, Fernandez returned to his office and tossed the tax forms out the window to the policemen.

Attached was a hastily scribbled note: "Thank you very, very much."

The patrolmen mailed the

## The Atomic Reactor's Reactor

In a material sense, the shape of our civilization and the quality of life which the average citizen will enjoy, the length of the work week, the level of income, the kind of homes, automobiles, amusements, education and opportunities available, will depend to a great degree upon how successful we are in producing vast amounts of energy at low cost. It now appears that energy derived from the atom, one way or another, will be a major energy source of the future.

Discussing developments in this field, a recent issue of Fortune magazine points out that "Nuclear power suddenly and dramatically came of age in 1966." More than \$2 billion worth of nuclear power plants were ordered by utility companies during the year, and by 1973 when all of these plants will be in operation, the United States will possess 30,000 megawatts (million watts) of nuclear generating capacity. This is some three times the amount foreseen by the Atomic Energy Commission in 1962 forecasts.

One leading manufacturer of atomic generating equipment expects nuclear fission to account for 30 per cent of the nation's power needs by 1980. Many factors have influenced this rapid growth.

First of all, the cost of producing electricity with the atom has been reduced sharply by improved reactor design and by the fact that surging demand for electric power has resulted in utilities needing ever larger generating stations. The larger stations produce electricity at lower unit cost. This trend has now progressed to the point that electricity generated by nuclear fission has become cheaper in many areas than power produced by burning coal and oil.

Despite the rapid growth and the development already achieved, only the first few words have been written in what will unquestionably be a very long and significant story. As Fortune observes, "the atomic power industry is still young and inefficient. Nuclear energy will get cheaper as time passes and as competition grows."

The second generation of atomic reactors, the one holding the most significance for man's future, has only now moved over the horizon of research and experimentation into the realm of practical development. This is the breeder reactor capable of creating more nuclear fuel than it burns.

Present nuclear reactors are merely substitutes for conventional boiler plants, burning uranium to produce heat which turns water into steam. A 750-megawatt atomic electric plant now consumes around \$9 million worth of nuclear fuel annually. Breeder reactors hold out the promise of reducing fuel costs to the near vanishing point.

In the words of Fortune, they "promise to deliver vast quantities of energy at such low cost that they will have a cascading effect on all industry, on man's efforts to gather food and build shelter, and on the fabric of society itself. Scientists and technicians, in a frustrating search for some way to describe the changes that their work portends, speak glowingly of air-conditioning Africa and heating the subarctic."

The technical problems still remaining to be solved in creating this virtually limitless energy source are formidable.

Decisions must be made as to what techniques should be tried, and how fast development should be pushed.

Then, there is the question of how to divide the cost of research and development, estimated at some \$2 billion dollars, between industry and the U.S. Atomic Energy Commission. Speed of development of the breeder reactor will be influenced by present efforts to improve the efficiency of the "uranium burning" atomic power plants.

One thing seems evident at this point. Atomic development up to this time has been vastly accelerated by the competitive forces of our free economy. If these same forces are allowed to remain in play, the near incalculable potential of the atom will probably be developed as the energy requirements of our civilization call for such development.

Even in the far out realms of nuclear science, certain human relationships hold true. Progress in the future, as in the past, is most likely to occur in the stimulating environment of a competitive market system where success goes to those who satisfy most fully and efficiently the wants of the consumer.

It doesn't seem to matter whether that consumer is an electric power company in need of a better generating plant or a little girl looking for a hair ribbon, a bit different in shape and color than any she has had before.

## Apollo's Lessons

Intensive investigation of the tragedy that took the lives of three astronauts in the fire aboard the Apollo 1 space cabin has brought disturbing criticism of "many deficiencies" in design and engineering, manufacture and quality control which created "an unnecessarily hazardous condition."

While the exact cause will "most likely never be positively identified," enough is known to point the need for prompt corrective measures. Clearly the danger of fire had been underestimated and only now are emergency procedures being rewritten to speed depressurization of the cabin.

Hand cranked hatches which required 90 seconds to open obviously are unsuited to emergency operation and should be replaced with charged hatches that can be blown instantly with the flip of a switch.

More nonflammable material, including the space suits themselves, should be utilized. Even more important, as the report indicates, priority must go to improving workmanship all along the line.

Possibly in anticipation of a critical report, NASA has been shuffling its supervisory personnel at the Houston space center. It may be difficult to pinpoint responsibility for either mechanical or human failure in the highly complex space operations.

A tragedy of this nature, however, demands a total review of personnel, procedures and equipment.

With the report as a guide, it becomes incumbent upon NASA to allow no preconceptions to stand in the way. Neither should time be allowed to become an inhibitive factor. No race to supremacy in space is worth the needless sacrifice of human lives.

## Right To Read

In attempting to enjoin the further sale of the book, "How to Avoid Probate," the New York County Bar association has raised questions that go beyond the merits of the book.

The lawyers charge the book advising persons how to plan their estates without legal costs, constitutes the practice of law without a license, and hold the court must bar its sales to halt further misleading of the public.

Since the book has been adjudged a best-seller for 48 weeks, the lawyers seem to be a little late, and their move to ban the book may backfire in the form of expanded sales. Beyond that is the issue of the right of the state to suppress a book except in cases of outright fraud or flagrant prurience.

The charge that the public may be misled by a book hardly justifies a court order forbidding its sale. The medical profession, for example, has been annoyed by the publication of countless tracts by health faddists. In most cases physicians have been content to warn the public of the dangers in such books without attempting to suppress them.

### Glancing Backwards—

#### ST. JOE UNIT CLUB OF YEAR

Al Hinkelman, former mayor of Benton Harbor, was elected governor of District 62, Toastmasters International, and Mainstreet Toastmasters of St. Joseph was named "Club of the Year" at the state meeting in Lansing Saturday.

Hinkelman of St. Joseph, a charter member of Mainstreet Toastmasters, an active civic and church leader and an expert on parliamentary procedure, was elevated from his position as educational lieutenant governor. The St. Joseph club won the "Club of the Year" award for the third time in the last four years.

#### HOME-SCHOOL ELECTION HELD

Mrs. Howard Fairman was elected president of the home and school association of St. Joseph's Catholic school, succeeding Mrs. S. A. Fassnacht. Also elected were Clarence Blay, vice president; Mrs. Don Ruple, recording secretary; Mrs. Layson Voorhees, corresponding secretary; Ray Laufenberg, treasurer; Mrs. Arthur

Fellows, historian; Mrs. Edward Barlow, parliamentarian. The nominating committee included Joseph Hanley, Mrs. Eric Kesterke, Francis Livingston and Alan Luckner. Mrs. B. J. McDonnell presented the safety patrol boy award to John Scheer and Mrs. Louis Rondelli reported on fluoride treatments for the summer.

#### AUTO DEALERS ARE RECRUITERS

Automobile dealers in St. Joseph and Benton Harbor have turned recruiters for the army. Uncle Sam is preparing to use in smashing the Axis.

Cooperating with the National Automobile Dealers' association, twin city dealers are seeking volunteers to be organized into a specialized battalion for overseas service. Battalions will be established in heavy repair bases for mechanical equipment and will be rated non-combatants. The age limit is 45 years. Needed are auto mechanics, sheet metal men, welders, painters, blacksmiths, radio amateurs, carpenters, electricians, telephone linemen, machinists, clerks, tinsmiths,

tire rebuilders, tool makers, and upholsterers.

#### QUEEN FINALISTS

Finalists to date in the Blossom Queen contest are Leontine Renner of St. Joseph; Mildred Briney, Coloma; Pauline Hartsell, Buchanan; Mara Wooley, Berrien Springs; and Lillian Tellam, Paw Paw.

#### AT THE THEATER

Current attractions at the Caldwell theater are Elsie Ferguson in "Foot Lights," and Jackie Coogan in "My Boy."

#### SALOON CLOSINGS

Three of 10 saloons now doing business in Niles April 30 under the Warner-Crampton act.

#### SELLS HOUSE

William Wallace sold his house at the corner of Court and Jones streets to Thomas Ryan.

## You're Telling Me!

By HOYT KING

By the early 1970s we'll be able to pay our grocery bills via computer instead of with cash or check, a Federal Reserve Board member predicts. That's certainly food for thought!

A Brisbane, Australia, resident, age 61, has been charged with drunkenness for the 1,358th time. He's led a full life!

That Australian's struggle to overcome Old John Barleycorn has certainly been one unending bottle!

A Kings Lynn, England policeman successfully rounded up and returned to their crates in a fish store more than 100 crabs who had broken free and were scuttling down the street. That is real news—since it was the officer and not the crabs who made the pinch.

## TRY AND STOP ME

By BENNETT CERF

One of the most hazardous occupations in the theatre for the past two decades has been trying to steal a scene from the inimitable Tallulah Bankhead—but a brash monkey almost got away with it at a tryout one evening. The curtain had just gone up for Act Two, and Tallulah had not yet delivered her first line when the monkey yanked off the wig she was wearing for her part, jumped from her arms, and threw the wig to a startled play-guy in Row C of the orchestra. Miss Bankhead, however, promptly stole the scene back by doing a perfect double somersault.

Old Lady Scroggins had celebrated her eighty-fifth birthday, but still had plenty of ginger left in her. In fact, on a date with a gay widower, she had to slap him three times. "Did he get fresh with you, grandma?" asked her grandson anxiously. "Fresh?" echoed Old Lady Scroggins. "He wouldn't dare! I had to slap him to make sure he wasn't DEAD!"

#### QUICKIES:

An actor's wife has found a way to make her husband eat leftovers. She tells him they've been held over.

Mrs. Horntoot saw a pair of acquaintances in the lobby at an opening night and remarked to her husband, "Now, that looks like a happily married couple." Replied Mr. Horntoot warily, "Don't be too sure, my treasure. They're probably saying the same thing about us."

## speaking of YOUR HEALTH

By Lester L. Coleman, M. D.

"There is no use lying doctor. I'm just plain scared to death!" This was the very first statement made to me by a new patient when he first came to my office.

To emphasize the impact of this, I must describe him in detail. He was a professional wrestler. His size and appearance had absolutely nothing to do with the intensity of the fear he felt and expressed.

We chatted for a few minutes and, despite my efforts to minimize his anxiety, I found that it mounted and grew worse. It reached a peak when he suddenly said, "Doctor, I'm parked near a fire hydrant, do you mind if I put off this appointment until tomorrow?"

Here was an adult who reverted to a child-like pattern of escaping from a real situation by running away because he was unable to conquer the fears that had been distressing him for such a long time.

#### DECIDED TO STAY

When I sympathetically explained to him why he reacted as he did without embarrassing him, he smiled and quickly decided that it was kind of silly and that he would stay after all. Inquiry finally showed that he traced his fears to the age of five when he was treated and later operated on for an acute infection of the mastoid. Since then he lived in mortal dread of doctors, injections and a gagging wooden tongue depressor.

When he finally spoke freely about his fears he realized that he had been walking around for months "dying of a disease he never had." He was "sure" that he had a cancer of the larynx because he was smoking excessively and could not, in his better judgment, stop.

#### TOO MUCH TOBACCO

Examination of the larynx showed it to be perfectly normal except for the redness and irritation of a larynx beaten by too much talking, screaming and too much tobacco.

When I assured him again that there was no sign of real trouble he seemed to get no pleasure from it. In fact, he

looked at me and said, "How do I know you're telling me the truth?"

So deeply ingrained was his unreasoning fears that there was no way to communicate with him at this time. So sure had he been that his life hung in the balance that he later confessed to me that he actually had made out a will and reconciled himself to the fact that he was no longer able to work. His whole world seemed to revolve about the central core of destructive fear.

#### REVEALED OTHER FEARS

After many visits I was able to establish a relationship that he believed in. During this time he revealed many other kinds of fears that he had been unable to express.

Under my persuasion this patient was shown that even men of his size sometimes needed the guidance and assurance of a psychiatrist or psychologist when their problems could not be handled by themselves, their friends or their relatives.

It takes a well-trained person who knows the art of listening and interpretation to unravel the complexities of emotional problems.

#### EXPRESSED ANXIETIES

When my patient first began to express his anxieties, to openly speak about them, he became intrigued with his ability to recall vivid experiences during his early life. Soon he was able to recognize how they affected his adult behavior and his entire relationship with his wife and children.

Talking out his problems liberated him from the enclosure of fears that had been distressing him for many years. The last time I saw him he was still engaged in the same occupation, but now constantly making plans for a future that he believed in.

**SPEAKING OF YOUR HEALTH**—Some form of physical exercise is good for everyone at every age.

These columns are designed to relieve your fears about health through a better understanding of your mind and body. All the hopeful new advances in medicine reported here are known to doctors everywhere.

## CONTRACT BRIDGE...

By B. Jay Becker

East dealer. Both sides vulnerable.

NORTH		EAST	
♠ A95	♥ A2	♠ J743	♥ A2
♦ J108	♣ 10863	♦ Q54	♣ J97
♠ 742		♠ K1086	
WEST		SOUTH	
♠ 1062	♥ Q7643	♠ KQ8	♥ K95
♦ Q54	♣ 93	♦ AK2	♣ AQJ5

The bidding:  
East Pass South 2NT West Pass North 3NT

Opening lead—four of hearts.

The technique of good dummy play depends more on sound reasoning than any other factor. The secret of winning bridge is the avoidance of error, but there are so many traps built into the ordinary run of hands that it is very difficult, if not impossible, to avoid them all.

For example, take this deal where South was in three no-trump and West led a heart. Declarer played the ten from dummy and East won with the ace. South finessed the heart return, the nine losing to the queen, and West returned a

heart, declarer winning with the king as East discarded a spade.

With only seven tricks in sight, South went after the clubs. He led a spade to the ace and successfully finessed the queen of clubs. As he had no more entries to dummy, he then led the ace and a low club. When it turned out that the king did not fall and the suit did not divide 3-3, he wound up going down one.

The result might possibly be charged to bad luck, but, actually, South should have made the hand. The unusual solution to the problem goes back to declarer's play at trick one. He should have dropped the king of hearts on the ace!

First, let's examine the effect of this play. Regardless of what East returns at trick two, South gains an additional entry to dummy in hearts. This extra entry permits him to finesse clubs twice instead of once and gives him nine tricks instead of eight.

South should make use of the Rule of Eleven, which tells him that the only heart East has higher than the four is the ace. It therefore costs him nothing to play the king on the ace, and at the same time he creates a vital entry to dummy.

The fact that the play is unusual is certainly no bar to its use. What counts is its effectiveness.

## today's GRAB BAG...

By Ruth Ramsey, Central Press Writer

#### THE ANSWER, QUICK!

1. When was the famous Godey's Lady's Book published?
2. What Roman emperor proclaimed himself the supreme deity?
3. Where is the republic of Andorra?
4. Name the largest of the Central American states.
5. Who was known as "The Bravest of the Brave"?

#### BORN TODAY

London-born (1882) orchestra leader Leopold Stokowski emigrated to the U.S. in 1905, taking a job as organist and choirmaster of St. Bartholomew's Church, New York, where he remained until 1908.

After two years as conductor of the Cincinnati Symphony, Stokowski was named the conductor of the famed Philadelphia Symphony Orchestra, a position he held from 1912 to 1941. He made it one of the world's leading orchestras.

In 1939 he organized the All-American Youth Orchestra and toured the country with it. Additionally, Stokowski guest-

conducted many of the leading American and European orchestras, including the NBC Symphony and the New York Philharmonic, and wrote the book "Music for All of Us."

In 1955 Stokowski became conductor of the Houston Orchestra. He has also appeared in films and is internationally known for his interpretations of Bach.

Others born today include author Richard Harding Davis, painter Max Weber, actress Barbara Hale.

2. Augustus.
3. In the Pyrenees Mountains.
4. Nicaragua.
5. Napoleon's cavalry marshal, Michel Ney.

## B.H. RUSHING TO GET MARKET COMPLETED

### Build Own Horseless Carriage

But They Can't Drive It In Blossom Parade

By RALPH LUTZ  
Staff Writer

It's a neat looking little horseless carriage, not much like the moon buggy unveiled recently by Bendix, but just about as new and probably more fun to make.

This horseless carriage is a three-quarter scale replica of a 1903 Oldsmobile, powered by a 5 1/2 horsepower lawnmower motor.

Anthony Pantelleria, of 127 Elmside road, Fairplain, and his 23-year-old twin brother, Sam of Hagar township, manufactured the turn-of-the-century-type vehicle during the past two and a half years. Their father, Anthony Pantelleria, Sr., Hagar township, offered a guiding hand.

Word of this new, old-model auto, complete with fringe on top, coincided with news of the moon buggy, a product of Bendix Aerospace Systems division plant in Ann Arbor.

The moon buggy, described Monday in this newspaper, looks like an oversized soap box derby racer with ponderous wheels that someday may roll over the moon's surface.

**NO LICENSE**  
The trim little horseless carriage probably won't get as far as the Blossom parade, for lack of a license plate. According to its builders, it now is equipped with a brake on only one wheel. They said the law requires brakes on all wheels to license it.

Young Anthony said the idea for the vehicle came from a magazine. He currently is a Lake Michigan college student, majoring in secondary education.

A PLEASANT PASTIME: Anthony Pantelleria, 23, of 127 Elmside road, Fairplain, takes the throttle of 1903 Oldsmobile replica, manufactured by him and his brother, Sam, of Hagar township. Aiding them during the 2 1/2-year project was their father, Anthony Pantelleria, an engineer with F. P. Rosback Co. (Staff photo)

tion. His brother, Sam, is employed by Whirlpool Corp., and their father is an engineer with F.P. Rosback Co. The body is of plywood and

the spoked wheels include small rubber tires. Right down to the hand throttle, this replica appears worthy of its 1903 model original.

### ON NILES AVENUE

## Michigan Bell To Answer S.J. On Underground Lines

Monday night's meeting of the St. Joseph city commission, minus the fireworks of its two previous sessions involving the disposition of Urban Renewal Block 4 and the burying of telephone lines in the Niles avenue widening project, reverted to the more conventional

### No Action On Tavern Relocation

B.H. Awaits Word From Liquor Unit

Relocation of a "flats" tavern was the subject of debate, but the Benton Harbor city commission took no action last night pending word from the Michigan Liquor Control Commission.

Commissioner F. Joseph Flaugh urged a decision, one way or the other, so Mrs. Sarah Cook, owner of Cook's tavern, 127 Market street will know if she is going to get local approval to move to 421 Terriorial road.

Flaugh declared, "It seems very difficult to get a simple answer." He added that Mrs. Cook is "in a legitimate business" and "I don't think we're dealing with her in a proper manner."

Liquor Committee Chairman Edward West said there was "no cause for action" last night because no application for the transfer had been filed with the MLCC.

**MAYOR'S VIEW**  
Mayor Wilbert Smith said the commission should follow its established procedure and not act on the transfer until it hears from the state. Prior action could establish a precedent. Smith noted that Urban Renewal Director Leslie Cripps had showed Mrs. Cook several places which were turned down.

Flaugh accused the commission of "sidestepping the

half-hour session of hearing reports and taking action in routine matters.

Atty. John L. Crow, appearing with some 25 Niles avenue residents, asked what answer had been received from the Michigan Bell Telephone company to an April 10th resolution of the commission ordering the lines to be put underground.

Leland Hill, city manager, said the utility indicated its reply would be made within a few days.

A week ago an MBT estimate that it would require \$12,500 to over \$14,000 to bury the cables, depending on the length of the underground passage, drew spirited demands from a Niles avenue delegation that the cost be placed elsewhere than against their properties.

The Niles avenue residents in the street widening area claim the present pole carried cables, now being temporarily relocated, that do not serve their homes. They also assert the street widening creates a loss in property values that will be increased if the pole carrying system is continued.

In a brief comment on the situation, Atty. Crow said, "We're not here to harass anyone. We just want to know what can be done."

No allusion from the commission nor from a few interested onlookers in the audience arose on recent proposals to blockade part of Ship street or to take the site of the federally financed senior citizens housing project for a motel development on Urban Renewal Block 4.

**MAYOR PRAISES UPTON**  
W.H. (Duke) Ehrenberg, presiding for the first time as mayor, obtained unanimous consent from the commission specially commending Frederick S. Upton, named last week by Governor George Romney as one of 10 outstanding civic leaders in the state.

Said the mayor of the retired St. Joseph industrialist, "We are proud of him."

The St. Joseph Lions club received approval to hold its annual tag day (White Cane drive for blind people) on April 28-29 and the Berrien County

Health department was granted permission to use the Whittiesey avenue skating rink building from May 31 to June 9 to conduct a check-up for persons of 40 years or older. The check-up, including blood and urine analysis, is on a volunteer basis.

**ROAD FUNDS**  
Voting 4-0, with C. A. Tobias abstaining, the commission approved a request from the Michigan Municipal League supporting State Highway Department proposal to raise the gasoline tax one cent and the license tax from 35 to 55 cents per hundredweight on automobiles.

The Highway Department argues the state taxes must go up if the Michigan road program is to function satisfactorily. The Department titles a cutback in federal funds as an additional reason for more money.

Hill told the commission the additional revenue could increase St. Joseph's share in highway aid from its estimated \$110,000 this year to \$130,090.

A request to pave an alley from Price to Jones streets, between Church and Court streets, found no objectors to the proposed assessment for the work and automatically advanced to the contract letting stage.

The commission received for filing a petition from residents on Evergreen drive requesting that sidewalks not be installed. Kenneth Duesenberg, 2810 Evergreen drive, who filed the document, said, "This is a dead-end spur where sidewalks are not necessary."

**VARIOUS BOARDS**  
The commission reappointed a number of members on semi-independent boards. They were: Board of canvassers (election certifications), William R. Knaak (D.) and Robert J. Molhoek (R.)

Cemetery board, Edward J. Zick.  
Library board, Clare L. Milton and Mrs. C. Moulton Davis.

Airport board, Robert M. Mitchell.  
Harbor authority, Joseph A. Sauer, Lee Hornack and Thomas Harvey Owen.

Planning commission, L.J. Zick.

(See back page, sec. 1, col. 6)

### Atty. Gleiss Heads Voter Campaign

Unit Of B.H. School Election

HENRY GLEISS

Richard Seagrave, chairman of the public information committee for the coming Benton Harbor school bond election, has announced the appointment of Henry Gleiss as chairman of the voter drive committee.

Gleiss has practiced law for 10 years in Benton Harbor. He holds degrees from Denison University, Granville, Ohio, and the University of Michigan Law School. He is a partner in Gray, Gray, Globensky & Gleiss law firm, 72 West Main street.

Gleiss has been active in community affairs as president of the Fairplain Northwest PTA; a member of the board of directors, Chamber of Commerce; the Little League; and the St. Joseph Congregational church.

Mr. and Mrs. Gleiss live at 1224 Miami road, Fairplain, and have two sons.

Assistant Chairman of the voter drive is Donald Boerma, a member of the board of education.

### Anti-Litter Show Tonight

"Why Ugliness?" is the timely topic of a public slide-lecture presentation tonight at 8 o'clock in Benton Harbor high school auditorium. Conducting the program will be F. Eugene Smith, nationally known crusader for beautification from Bath, Ohio. The free event is sponsored by the Benton Harbor public commission.

### Contract Awarded For Stalls

\$164,880 Low Bid By Central Fabricators Co.

Contracts for 150 stalls at Benton Harbor's new fruit market were awarded last night as the market board continued to zero in on a June 1 opening for wholesale trading.

The contract for \$164,880 went to Central Fabricators, Inc., of Benton Harbor whose over-all bid was \$1,494 lower than the nearest competitor. The winner was about \$10,000 less than preliminary estimates.

Four of the six loading docks are slated for completion June 1—the others June 15. One hundred of the stalls already have been rented to brokers.

So far, the city has committed about \$315,000 in contracts on its vow to replace the market in the "flats" that has been virtually demolished by urban renewal.

#### PROGRESS SO FAR

Completed is earth work on the 23-acre site of the new market between Territorial road, Red Arrow highway and Crystal avenue. Under construction is a retail market to be completed May 1. Contracts still to be let are paving the trading area and building a market office.

The market board acted on another matter of urgency as it voted to lease for 10 cents a square foot market land that will be used by two fruit package firms.

City Manager Don Stewart said up to 9,000 square feet will be required. The vendors, Midwest Fruit Package Co. and Bud Litovich, will put up their own buildings. The lease rate will be per season. Stewart recommended that the leases run five years with option to renew.

Sam Monte of Midwest said his company will start a building today.

#### NEXT MEETING

The market board, composed of seven city commissioners, will meet Wednesday with the market advisory committee to hash out a big agenda. City Manager Stewart said matters include a market ordinance, the fees, budget, staff and access routes.

Six representatives of growers, buyers and the public make up the market advisory committee.

The market stalls will have concrete bases, steel frameworks and metal roofs. Three of the sheds will be 300 feet long and three will be 200 feet.

Central Fabricators have bid was \$567 lower than Burkholder Building Co. of Nappanee, Ind. and Lawrence, Mich., contractor for the retail market. However, the board selected an option of reflectorized white roofing which made Central low bidder.

City Engineer Sam Wells estimated it would mean 10 degrees cooler temperatures than a plain galvanized roof. Stewart observed less heat was better for the fruit and people working under the roof.

Other base bids were Gosnick Construction Co. \$182,955; Peterson Building Sales \$197,000; and Martin Building Service \$205,569.

### Boy Says He Was Harassed

Benton Harbor police reported that a Negro boy who attends Benton Harbor junior high school, told them he had been accosted in Hall park by about five or six white youths.

Patrolman Cyril Fuller said the boy told him at 9:28 a.m. he had left school to go home for something and was on his way back when the youths approached him in a blue auto, called him names and tried unsuccessfully to head him off with the vehicle.

**B.H. Girl Is Missing**  
Benton Harbor police yesterday were told that a 10-year-old girl has been missing from her home since about 5 p.m. Sunday.

The missing girl was identified as Pamela Winston, daughter of Mrs. Jessie Lee Pen, 680 East Vineyard street. She is described as a Negro, who is four feet tall and weighs 90 pounds. She was reported wearing blue jeans, and a blue sweater.

REPAIRS ARE PLANNED: Holes, such as this seen in the metal grating surface of the Highway bridge, joining Benton Harbor and St. Joseph, are scheduled for repairs, as soon as possible, an official at Michigan State Highway department office at Portage, said Monday. Ernest Ray of the highway department's maintenance office said a department welding crew will soon make necessary repairs, adding that this is nearly always an annual project on the bridge. He said weather and stress from traffic cause the breaks. Holes are not affecting safety of structure, Ray said.

### JOINS NEIGHBORS

## St. Joseph Township Okays Study On Sanitary Landfill

St. Joseph township trustees voted last night to proceed with negotiations to create a sanitary landfill for rubbish disposal involving five Twin Cities area municipalities.

The measure does not commit the township to expenditures but give official backing to negotiations scheduled to include Benton Harbor, St. Joseph, Benton township and the Village of Shoreham.

Talks among the municipalities have been going on for months and attorneys are now drafting formal agreements. The landfill proposal developed because of state legislation prohibiting open dumps.

Supervisor Orval Benson said St. Joseph township's disposal currently is in good condition with a Hartford firm collecting trash. But he admitted that the present system of hauling St. Joseph trash to Covert was uneconomical and the township should look to the future in

joining the landfill authority. In other matters: Trustees appointed Carl Reschke to the unexpired term of

Gale Smith who died unexpectedly March 20. Reschke, 42, first appointed to the board in 1961, was elected to a full term in 1963. Last August he was defeated in a re-election bid by Dr. John T. Manning. He will serve to 1969.

Reschke had headed the township water and sewage negotiating committee. He is supervisor of the Laundry Group experimental model shop at Whirlpool.

**MAILBOX NUMBERS**  
Township trustees also reaffirmed support for a house numbering system. After Gerald Wahl of the Lakeshore Jaycees explained the program and Robert Dyer, superintendent of mails at the St. Joseph post office, said the post office department was required to follow the system adopted by local government units, the board repeated earlier endorsement of the project.

Wahl said the Jaycees expect to have all the township numbered by May 1. He said that when the system is finished

Carl Reschke Returns to board

Carl Reschke Returns to board

## Cunningham Awarded Highest State Honor

Atty. Wilbur M. Cunningham, of 401 Maple street, Benton Harbor, was presented the Michigan Archaeological society's highest honor, its award of merit, Sunday at the annual state meeting at Michigan State university, East Lansing.

The award was presented in recognition of his outstanding service and contributions to the society and to Michigan archaeology. Mrs. John D. Page of Watervliet, president of the Southwest chapter, presented the award in behalf of the society. Cunningham retired recently from his law practice.

William Beverly, Jr., state president until Sunday, said it

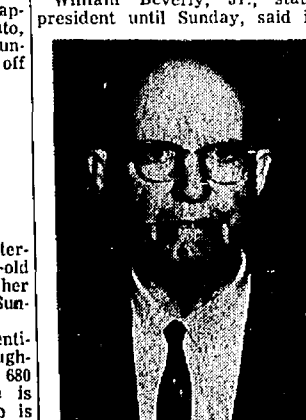

was quite an honor to have Cunningham received the award. Only seven or eight have been awarded in the past, he said, and four of these were to members of the Southwest chapter.

The society in its resolution of recognition, said Cunningham "distinguished himself as a leader, painstaking researcher, author, investigator, field worker, lecturer and organizer," thereby kindling interest "to the fascination of history and prehistory in Michigan."

The resolution also cited Cunningham as principal organizer of the second Michigan Archaeological society and its first president; for his numerous publications including four editions of "Land of Four Flags," a history of Southwestern Michigan and Fort St. Joseph at Niles, and his contributions as a person to the Michigan Archaeological society.

"Throughout his long career," the resolution stated, "the character of the man, his humility, his service to his community, its children and its schools, his love of family, God, and country, his modesty and his sincerity, all are inseparable qualities that enriched his many endeavors and seemingly inspired a personal creed, '... to be an asset to his fellowman'..."

The award has also been presented to George Fox of Dowagiac, Amos Green of Eau Claire and Harvey Franz of Benton Harbor.

Historian gets award

## Special Trash Pickup Days Are Scheduled

All the rubbish St. Joseph township residents can haul out of their basements and back yards will be hauled away in special rubbish pickups May 6 and 13—Supervisor Orval Benson announced last night.

On May 6 the Saturday morning pickup will cover Fairplain. On Saturday, May 13 the rubbish will be collected on the west side of the St. Joseph river.

firemen, for instance, could look at a map and come within 300 feet of any number.

He admitted that some residents were opposed and others disgruntled over the fact they have had two sets of numbers. Benson said that in one year's period he had been assigned three mail box numbers and had his telephone number changed three times — and he survived.

Mr. K. A. (Nurma Jean) Spooner, 2499 Roncy road, Benton Harbor, was re-appointed deputy clerk.

Atty. Ron Taylor obtained authority for review of a zoning board rejection of a service station at the corner of St. Joseph drive and Washington avenue. The zoning board had rejected the petition on the grounds a service station would add to the hazard of the traffic in the area. Taylor argued that if the property owner fulfilled all the requirements he ought to be able to sell the property to a

## SOUTH HAVEN BUDGET INCLUDES TAX HIKE

DEATH SCENE: Berrien Sheriff's Deputy Eugene Eklund, left, and Sgt. Forrest Jewell survey skid marks at the scene of a fatal accident at the north-west edge of Berrien Springs. Killed when hit by a

car as he crossed the street was three-year-old Mark L. Hill, son of Mr. and Mrs. Kendall Hill, 112 South George street. (Staff photo)

Tentative  
Figure Goes  
To CouncilVoters Okayed  
Improvements  
In FebruaryBy JIM DONAHUE  
Staff Writer

SOUTH HAVEN—A proposed \$834,298.80 budget for the 1967-68 fiscal year, with a suggestion for at least a one-mill increase in city taxes, was presented to the city council last night by city manager Fred Timmer.

The document was not discussed, although aldermen made plans to hold the first of a series of executive meetings Wednesday afternoon to review it and make changes.

Adoption of the budget must be made by the third Monday in May and it will go into effect July 1.

If approved as recommended, the proposed budget would call for an increase in anticipated expenditures of \$81,362.80 over the present budget.

The increased budget figure reflects a new capital improvement account in the city's general fund, which Timmer said would be estimated at approximately \$152,504, a \$14,000 increase in anticipated police expenditures, and a \$15,000 increase in the cost of a health officer and trash removal.

## TAX INCREASE

In a letter to the council, Timmer suggested that city taxes be increased from 26 to 27 mills. He said the one-mill increase, in addition to the additional tax revenues anticipated from a \$1,009,400 increase in city assessment, would bring about \$385,948.80 into city coffers.

This is an increase of approximately \$40,500 in tax revenues over last year, Timmer said.

The council has been considering a tax increase this year of as much as three mills, or \$3 for every \$1,000 of property valuation, to pay for a planned street improvement program and help carry the load on a planned \$1,450,000 sewer and water system improvement project.

City electors approved a general obligation bond issue to finance the construction work in February, although aldermen expect to pay off the bonds on profits from the electric utility.

The balance of the proposed budget increase would be offset by an additional \$40,826 in expected receipts from city operations. Additional money may come from a board of public works payment in lieu of taxes, increased sales tax returns and sale of special assessment bonds for street work.

Timmer also informed the council that a planned transfer of \$80,000 from the board of public works to the city general fund, plus a time deposit in the special assessment fund will give the city a potential of \$296,092.85 for capital improvements for the new fiscal year.

With this information at hand, the council proceeded last night to start the machinery for next year's \$219,000 in street repair and new construction this summer.

## RETAIN ENGINEERS

Members voted to retain the services of engineers at Canonic Construction Co., of South Haven, which is now in the process of forming a new corporation for this work. The council will ask to have plans and specifications prepared for bidding on the following street projects:

- Construction of curbs and gutters and storm sewers, followed by paving of Aylworth avenue from Bailey to LaGrange streets and from Indiana avenue to Monroe boulevard at a cost of about \$113,000.
- Construction of curbs and gutters and paving of Elm court, from Monroe boulevard to St. Joseph street, by special assessment.

Classes will be held both in a newly-constructed hangar at the Dowagiac airport and in the college's new vocational-technical building.

The graphic arts course will be taught in conjunction with the new Clark Equipment Company's Graphic Arts Center which is located just east of Dowagiac near the college campus.

This program is designed for the student interested in the technical levels of art, photography, technical writing and machine duplication in relation to development of sales promotion literature.

In addition to classroom and laboratory instruction, graphic arts students will receive on-the-job experience at various area firms, including Clark Equipment which has agreed to take six students on a co-op study arrangement.

BARBARA PEAINE

KENNETH PEAINE

GLORIA PEAINE

★ ★ ★

Probe Crash That Killed  
South Haven Boy, Sisters

SOUTH HAVEN—South Haven state police continued investigation of the cause of the triple fatality Sunday that claimed the lives of Gloria Peaine, 8, a sister Barbara, 16,

and a brother, Kenneth, 13, all of South Haven, on Pullman road, five miles north of South Haven.

Police questioned 17-year-old John Reedy, Jr., South Haven,

who denied racing his vehicle with a car driven by Gloria Peaine.

Reedy, who witnessed the wreck, told police Sunday he was driving east on Pullman road when the Peaine vehicle passed him at a high rate of speed and then went out of control and struck a tree.

A survivor of the wreck, George Peaine, Jr., 15, was quoted as telling police at Memorial hospital in St. Joseph that the vehicle he was riding in attempted to pass the Reedy car but had difficulty because the other vehicle speeded up. Peaine was listed in fairly good condition today suffering multiple fractures of his left shoulder and arm and possible internal injuries.

Another passenger in the Peaine vehicle, 18-year-old Nancy Torp, South Haven, was listed in fair condition at Memorial hospital. She was suffering from facial fractures, a fractured left leg and possible internal injuries.

A third passenger that survived the crash, Shirley Washcgesic, 13, South Haven, was listed in poor condition today at Borgess hospital in Kalamazoo where she was being treated for a fractured leg and possible head injuries.

## SCHOOL ELECTION

Buchanan Voting  
Will Be Faster

BUCHANAN — To facilitate the handling of voters at the special school election May 9, the Buchanan board of education last night appointed an extra board of election inspectors.

With the extra workers, it will be possible to have two lines of voters going through at the same time. The extra inspectors appointed are Mrs. Evadene Clark, Mrs. Henrietta Miller, Mrs. Margaret Renbarger, Mrs. Lucille Mills, Mrs. Katherine Tees, Mrs. Esther Hamilton.

At the election, the board will ask voters to approve an increase in the millage for operation in the amount of 4.45 mills and for the extension of the 7.4 mills levied in 1964 which expired in 1966. The 7.4 mills plus the 4.45 mills, all for special operation, would be levied for five years.

In response to a request by high school principal Donald Trull for journalism scholarships for four students to attend a summer course at the University of Michigan, the board voted to provide half the cost of scholarships or \$160.

Receiving the scholarships are Sandra Berg and Janice staff and Jackie Nelson and John Colip of the school newspaper staff.

William Fairman, assistant superintendent of schools, presented a report on the special education services in operation in the local schools through the combined financial sponsorship of the State Department of Education and the special education division of the Berrien County Intermediate School district.

Fairman said these services provide effective and continuing educational programs for pupils with special needs. The local schools have four classrooms for the mentally handicapped, two in elementary and two in junior and senior high.

At the present time, there are 86 pupils in the speech correction classes throughout the system. Fairman said this is the first year that remedial reading classes are under the financial sponsorship of the State Department of Education. The classes are limited to a maximum of 50 pupils per teacher. Because of the student limitation, Fairman said, it may be advisable to add another elementary remedial reading teacher in the near future.

He added that the school has a diagnostician who works out of the special education division of the county school district. She does all the testing and screening of mentally-handicapped children.

A new service this year is the consultant for the mentally handicapped program who serves as a resource person to teachers of handicapped children.

The board granted a leave of absence to Miss Betty Braxton, sixth grade teacher, next year so that she may return to school to work for her master's degree.

A letter was received from

## Killed By Car

DETROIT (AP) — Elmer Benson, 64, Detroit, died Monday from injuries suffered Sunday when he was struck by a car while crossing a street.

Buchanan Lodge 449, Loyal Order of Moose, stating the lodge wishes to award a two-year scholarship to Lake Michigan college to a student selected by the school administrators and teachers. The offer was accepted and the lodge will be sent a letter of thanks.

The board authorized the payment of bills totaling \$90,098.13. This includes \$80,377.02 for salaries.

## BY DOWAGIAC

Electrical Rates  
Set For Heating

DOWAGIAC — Newly-elected city council members and officials were sworn in last night. The council then received the budget and approved a new rate schedule for all-electric homes.

City Clerk Albert First, re-elected last Monday, took the oath of office from City Atty. Herbert Phillips. First, they administered the oath to Justice of the Peace Robert A. Wilson and aldermen Ivan Gwilt and Victor Churchill of the first and second wards, respectively.

The budget for the fiscal year 1967-68 was presented to the council by City Manager Edward N. Simmons. Each alderman was given a copy and one was filed with the city clerk for public inspection.

The council will hold a session on the budget after members have had time to study the figures as presented. No copies were furnished to the press. Copies will be furnished to the public after the budget has been discussed at the closed-door session, First said.

## COMPARISON OF RATES

Councilmen also approved new rates which were approved April 12 by the municipal utilities board for electric use in "all-electric" homes.

A comparison with other area systems, drawn up by department officials, was given to councilmen.

It revealed the new rate for homes heated and powered by electricity in Dowagiac will be \$37.25 for the first 3,000 kilowatts.

This is \$25 more than the rate of Michigan Gas & Electric Co., which does not advertise a special rate for all-electric homes. Other comparisons with investor-owned utilities are Indiana & Michigan Electric Co., \$37.40 for 3,000 kilowatts and Consumers Power Co., \$49.19.

Some area municipal electric rates, listed against Dowagiac's \$37.25, are Niles, \$37.82; South Haven, \$46.60; Mishawaka, \$38.75; Sturgis, \$30.40 and Marshall, \$42.23.

The new rate applies to all-electric homes in Dowagiac. The other municipal electric rates remain the same.

## SEEK FUEL BIDS

Authority to advertise for 170,000 gallons of fuel oil by the board was granted by the council. Last year the cost was 9.8 cents per gallon. It may be 9.8 cents this year, according to Hugh D. Wear, director of municipal utilities.

The city tanks have a capacity of 202,000 gallons. The city generating plant used 132,000 gallons in the past year.

David Hayhow, Chamber of Commerce president, requested that the council amend the present ordinance to allow music to be furnished downtown during times of the year other than the 15 days before Christmas and the seven days before Easter.

The city attorney was instructed to draw up a change to cover this in the ordinance and present it at the next council meeting.

Renewals of annual trash hauling licenses were granted for Robert Johnson and James Jackson.

## PARADE APPROVED

A request for a Memorial Day parade May 30 starting on Main street from Michigan to Front was approved for Cass County Post 1855, Veterans of Foreign Wars, Lawrence O. Starrett, parade chairman, gave the line of march.

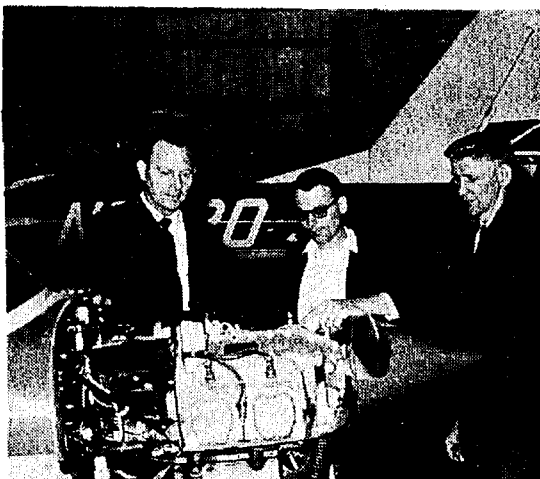

On recommendation of City Manager Simmons, bids on a new police car were rejected and he was authorized to again advertise for bids. One bid received was 300 higher than any received in recent years.

Storm sewers in the northwest part of the city were discussed and the flow of water traced by utilities director Wear. He said he believes some drains in Silver Creek township are in need of cleaning after several years. The council will study the matter.

Bills and payrolls totaling of \$61,988.23 were approved.

PLAN NEW COURSE: Representatives of the Clark Equipment company and Southwestern Michigan college are shown making plans for a new graphic arts course. Looking over material are Francis Hiscock, SMC dean of applied sciences; Joseph Henion, of Clark's Graphic Arts Center; and David Lightfoot, English instructor at the college.

AVIATION COURSE: Dick MacKeller (right), instructor in Southwestern Michigan college's newly-planned program of aviation mechanics, explains a phase of an aviation powerframe to Francis Hiscock (left), dean of applied sciences at SMC, and to James Springsteen, a student who intends to enroll in the program this fall.

Tapes Given  
To Library

DETROIT (AP) —A collection of 150 tape recordings, made by poet Carl Sandburg, were presented to Wayne State University Monday by five unions. The recordings include comments by Sandburg on his views of American poetry and Presidents Lincoln, Kennedy and Eisenhower.

The presentation was made by five AFL-CIO unions—the International Labor Press Association, the United Auto Workers, International Brotherhood of Editorial Workers, United Steelworkers and Amalgamated Meat Cutters of North America.

Aviation, Graphic Arts  
Courses Adopted By SMC

DOWAGIAC —Two new associate degree programs — aviation mechanics and graphic arts — were approved for the 1967-68 school year by Southwestern Michigan college trustees Monday evening.

The new programs are in the college's rapidly expanding vocational-technical department. College board chairman Dr.

Fred Mathews said the programs are aimed at filling the "tremendous" need for trained people in these two fields that are "screaming for help but can't get it."

He said the nation's airlines are especially desperate and that graduates of the two year aviation mechanics course at SMC would be virtually

assured of a fine job. Mathews said there are only 69 other institutions in the nation providing a course such as aviation mechanics and they are simply not coping with the demand.

The two year course is designed to prepare students for a licensing examination administered by the FAA. "SMC has been encouraged by the Federal Aviation Agency to proceed with its plans and hopefully will receive final approval from the FAA in the near future," said SMC President Dr. Nathan Ivey.

Classes will be held both in a newly-constructed hangar at the Dowagiac airport and in the college's new vocational-technical building.

The graphic arts course will be taught in conjunction with the new Clark Equipment Company's Graphic Arts Center which is located just east of Dowagiac near the college campus.

This program is designed for the student interested in the technical levels of art, photography, technical writing and machine duplication in relation to development of sales promotion literature.

In addition to classroom and laboratory instruction, graphic arts students will receive on-the-job experience at various area firms, including Clark Equipment which has agreed to take six students on a co-op study arrangement.

## HEALTH AID, TOO

Young Migrant Workers  
Will Get Summer School

PAW PAW—Special education courses for summer migrant children will be offered in southwestern Michigan this year through the Michigan department of education.

The project will be administered by the Van Buren Intermediate school district in co-operation with the local school districts and other service agencies in Allegan, Berrien, Cass, St. Joseph and Van Buren counties.

According to Ernest Shaw, assistant intermediate school district superintendent, the local program will be one of six to be

conducted by the state this summer in areas having high concentrations of migrant children. The southwest Michigan project is designed to meet the special educational needs of approximately 300 migrant children, ages six to 10, in the areas of language arts, music, art, home economics, physical education, recreation and social development.

Shaw said that related needs in the areas of medicine, food, clothing, physical health and emotional and social services will also be an integral part of the planned project. He said the

health services will be coordinated by the Tri-County Associated Health departments.

The teachers and counselors for the project will be a part of a pre-service and in-service training program for teachers of migrant children being conducted at Western Michigan university, Shaw said.

The project will also have the services of a mobile library unit provided by the Department of Education's division of library services, and a project involving college students in the Justin-Morrill honors college, Michigan State university.

# Budget Is Reviewed At New Buffalo

## Approval Near On Federal Loan

NEW BUFFALO — City councilmen last night reviewed a proposed budget for the 1967-68 fiscal year and heard a report that the city's application for a loan of \$750,000 for a new lake water intake project may receive approval soon.

The meeting of councilmen as the water board preceded a special meeting of the council called to review tentative figures on the proposed budget with James Merrifield, certified public accountant.

The total tentative budget, which includes a special assessment roll, is \$306,243. To operate the budget the council discussed ways to obtain the necessary \$26,202 over last year's budget by raising the millage from 14 mills to 17 mills.

## JAIL CELL

The additional three mills will include two extra for the general fund plus an additional half mill for the highway fund. A half mill is designated for a proposed holding cell for persons arrested by local police agencies.

Included in the general fund is \$4,500 for harbor condemnation damages; \$2,800 for an appraiser's fee and \$4,000 for the cemetery fund. A total of \$11,300 was figured for the general fund above last year's figure.

May 4 was set for the public hearing of the budget.

Mrs. Burnette Nichols, city treasurer, announced that real and personal property valuation in the city is \$6,650,500.

The council voted to hire Arthur Tews as city assessor for one year at a salary of \$800 for two assessment rolls.

In the meeting of the water board Andrew Krycka, city manager, reported that a letter was received from Robert Howard, a representative of the Farm Home Administration, of St. Joseph, advising him that an engineer from the state office had discussed the application of a loan to the city with two national FHA officials.

## EXPECT OKAY SOON

He said the officials now feel that the application will receive favorable consideration and he is confident of a tentative commitment in the not too distant future.

The board passed a motion to hire Layne Northern Co., of Mishawaka, Ind., to check and clean the three water wells in the city in order to allow them to pump to full capacity during the summer months. The city faces water restrictions during the summer months due to a water shortage. During the summer months restrictions pertain to watering lawns and the washing of automobiles.

# Youths Deny Four Charges In Benton

Two youths arrested in a "free-for-all" Friday night by Benton township police were arraigned before Justice of the Peace Chester Jolley, Jr. yesterday.

Richard N. Jones, 20, of Naomi Road, Sodas, pleaded guilty to a disorderly charge and paid fine and costs of \$35. He pleaded innocent to assault and battery and was released on \$100 bond.

Leonard R. Green, 20, of 819 Myrtle street, St. Joseph, pleaded innocent to three charges — reckless driving, minor in possession and disorderly person. Bond of \$100 for each charge was posted.

No date has been set for their trials. The two were arrested in what was described as a "free-for-all" Friday night in a parking lot at Fairplain plaza and included a chase on foot and a ride on the roller coaster of a car streaking across the plaza by an arresting patrolman.

# Ritzzy Detroit Hotel Behind On Mortgage

DETROIT (AP) — The Bank of the Commonwealth revealed Monday that the plush St. Regis Hotel is three months behind in payments on a \$1,350,000 first mortgage.

Norman E. Kleinfert, vice president of the bank's mortgage division, told a stockholder's meeting the bank held a first mortgage on the hotel which was three months delinquent.

He said the Area Redevelopment Administration had loaned the hotel \$1.4 million and held a second mortgage for that amount.

Albert J. Goodman, one of the original promoters of the St. Regis, refused any comment on the hotel's financial situation. He refused also to comment on reports that the hotel had been sold.

# AT EAU CLAIRE

## Deny Ousted Teacher Additional Payments

### EAU CLAIRE — The board of education last night declined to make further payment to a former teacher who was discharged from the Eau Claire faculty March 7 for alleged incompetence.

The former teacher, hired last fall, appeared before the board with a representative of the Michigan Education association.

tion to ask for severance pay and a settlement of his contract. He had been paid through the date of his discharge.

Supt. Don Silcox, who declined to name the ex-teacher, said he agreed he did not belong on the Eau Claire faculty but asked for severance pay. His discharge was approved by the board last month.

The board also approved expelling a high school girl, Silcox said, witnesses verified that she struck a teacher Friday. He said the girl is a chronic disciplinary problem.

The girl is the third student expelled in the last three weeks for assaulting teachers, the superintendent said.

C. Terry Harlode, representing the Eau Claire-Sodas Jaycees, attended the meeting to present a proposal of appointing an advisory committee from members of the organization to assist in school affairs. The proposal was tabled for further study.

Silcox was authorized to investigate the possibility of having a summer program for students in the special education department of the school.

Bills from the general fund were approved for payment in the amount of \$7,025.96 and an expenditure in the amount of \$2,109.44 was authorized from the National Defense Education account. It was announced that the balance in the three district funds totals \$81,254.53.

During the board meeting that followed, Phil Nickol was re-elected president; Dale Buice, vice president; and Gilbert Jilison, treasurer. Mrs. Agnes Pallen was elected secretary.

The new members of the 12-man board are Ronald Williams, Alvin Novak, Les Poorman, Mrs. Margaret Morehead, Lawrence Peterson, Joe Line-man and the Rev. Sidney Short.

The new budget is based on expected enrollment of 520 regular students in the fall, compared with present enrollment of 300 students this year, the college's first year of operation.

No tuition increase is included in the new budget.

However, board chairman Dr. Fred Mathews said tuition may be raised if the Legislature decreases the amount of state aid now paid to community colleges such as SMC. Governor George Romney has said state support of community colleges will have to be cut if his tax reform measures are not approved by the Legislature.

The 1967-68 building and site fund at SMC totals \$570,000. The 1966-67 building and site fund totaled \$1,386,000.

Present tuition is \$240 a year for full-time residents of Cass county. Non-resident tuition is \$360 a year.

Under the new budget, tuitions would provide a total of \$175,200. Laboratory, student service and application fees will bring in \$17,600.

Current general property tax will produce \$166,655 and delinquent tax collections amount to \$12,401.

State aid will provide a total of \$220,900. The food service and bookstore will bring in a total of \$17,250.

Teacher salaries will total \$282,367. Other salaries total about \$131,000, bringing to about \$403,000 the amount set aside for salaries.

Debt retirement is budgeted at \$80,550 with the remainder of the budget being used for materials and supplies, books, utilities, insurance, and other operational items.

DETROIT (AP) — Terry Ann Williams, 5, died Monday in a hospital from injuries suffered when she ran in front of a car near her Detroit home Saturday.

MIAMI, Fla. (AP) — A pre-dawn fire at a downtown Miami hotel killed a woman and severely injured an elderly man today and forced other guests to cling to window sills until fire ladders arrived.

The top floor of the three-story hotel burst into flames about 1:50 a.m., trapping more than a dozen sleeping guests in their rooms.

Firemen picked the people off the walls with ladders, a police sergeant said.

EVANSTON, Ill. (AP) — Calumet & Hecla reported Monday that its net income fell 10 percent in the quarter ending March 31.

Earnings were \$1,496,395, or 69 cents a share. This compares with earnings of \$1,662,142 or 77 cents a share for the same period in 1966.

President P.W. Robson said, "The decline in earnings from the first quarter of 1966, reflects the current softness in the durable goods segment of the economy, both in the United States and Canada."

"We had expected the effect of this adverse economic condition during this period to be offset by the contribution to earnings from the Calumet mining program. The delays in bringing the program into full operation and the costs involved account for the unfavorable earnings comparison," he said.

FIRST DIGGING on the Erie Canal will be commemorated with issuance of the Erie Canal stamp July 4. The stamp shows the stern of an early canalboat, with the words "Erie Canal" in red open-face type and beneath that, in black, "1817-1967." The cabin is light blue against which leans a black ladder. Tiller is black, hull red, and water and sky dark blue.

LONGEST GUN, in the non-Communist world at least, is this 120-foot cannon weighing 200 tons, to be used in high atmosphere research for the U.S. Army by Martin Company. The gun will fire a barium "bomb" that releases a luminous vapor cloud to measure electric fields and wind velocities a hundred miles above the earth.

Hospital Budget Is Approved

Cost Increases At South Haven

SOUTH HAVEN — A tentative budget of \$1,113,377 was approved by the South Haven Community hospital board of directors during a regular meeting Monday night.

Administrator W. W. Williams said the budget, \$185,483 higher than the current budget, reflects a general increase in the cost of everything, especially wages.

He hinted that pay boost for some employees may be coming if it is approved by the board.

Williams added that the budget is normally completed in April, to comply with hospital by-laws, but that the board may wish to make later changes and revisions following a study of hospital accounting procedures now being made.

The board voted to let a contract to Stafford Smith, of Kalamazoo, for installation of an air conditioning system in the front offices and professional rooms at a cost of \$4,335.

Members authorized the building committee to investigate architectural fees for the drawing of a preliminary plan for a new medical care facility.

Williams said that the hospital is presently negotiating for purchase of 12.4 acres of property adjoining the hospital property on the east as a site for this proposed facility.

Williams reported a low occupancy of only 68 per cent during the month of March which he said caused a loss of \$7,055.43 for the month. He said, however, that the books show a surplus of \$64,525 for the entire year.

Navy officials immediately canceled all leaves and passes for the 10,000 servicemen on the base.

Police Chief Armando Perez said "a couple of hundred" servicemen and civilians met in the streets. There were reports of fighting but no injuries were reported.

One Killed In Miami Hotel Fire

MIAMI, Fla. (AP) — A pre-dawn fire at a downtown Miami hotel killed a woman and severely injured an elderly man today and forced other guests to cling to window sills until fire ladders arrived.

electors of Chikaming Township was held at the Chikaming Elementary School on April 1, 1967 at 2:30 o'clock. An estimated 75 citizens were in attendance.

The meeting was called to order by the Supervisor. The clerk read the minutes of the last annual meeting; minutes were accepted as read.

Correspondence included communications from Michigan Townships Association, Berrien County Health Department, and Duncress Manor.

Trustee Clarence O'Grady presented a report of the township police department for the past year; Trustee Pearl Harrington gave the annual report of the fire department. Zoning Board chairman, C.W. Henkle, reported on the activities of the Zoning Board and the Zoning Board of Appeals.

Elmer V. Nelson, Township Zoning and Building Code administrator reported a total of \$563,220.00 in new construction in the Township during the past year, with a total of \$1164.00 collected in fees.

Roger Schultz, secretary of the Economic Development Study Committee, authorized by the 1965 Annual Meeting, reported a 5-point program of study planned by the group, viz. (1) the need of a township planning commission; (2) water pollution and sewage disposal; (3) police and fire department administration; (4) the economic growth of the township; (5) the consideration of "incorporation", or becoming a Charter Township.

It was moved by Edward Wiecek, supported by Max Ehler, that regular meetings of the Township Board be held on the first Thursday of each calendar month, at 8:00 o'clock E.S.T. in the Lakeside fire station. Motion carried.

It was moved by Frank Bard, supported by Arnold Abrahamson, that the Bank of Three Oaks be designated as the depository for all township funds. Motion carried.

Arthur Sandvick made a motion supported by Helen Brant, that Theron D. Childs, Jr., be retained as the township attorney. Motion carried.

The following Budget was adopted upon motion of Lucile Anderson supported by Mr. Bard:

RECEIPTS:

Balance on hand \$24,500.00  
Berrien County Road Com. 9,450.00

Anticipated Revenue-State Sources:

State Sales Tax Return 33,000.00  
State Intangible Tax 4,200.00  
Liquor Licenses 2,500.00  
Local sources - Anticipated Revenue:

Road Commission-matching fund 5,000.00  
Sale of cemetery lots 1,000.00  
Treasurer's fees 4,000.00  
Miscellaneous permits & fees 200.00  
New tax levy 17,000.00  
Zoning & Bldg. permits 1,200.00

Total all sources \$102,050.00

CHIKAMING TOWNSHIP

STATEMENT OF CASH RECEIPTS AND DISBURSEMENTS

For the Fiscal Years Ended March 10, 1967 and March 23, 1966

Receipts:

Current township taxes 23,500.68  
Delinquent taxes 1,941.87  
Interest on delinquent taxes 174.63

State of Michigan sources:

Sales tax diversion 33,265.32  
Intangibles tax 4,240.72  
Liquor license refunds 2,633.31

Other sources:

Sale of cemetery lots 890.00  
Zoning and building permits and fees 1,282.05  
Street lights - 0.00  
Transfer from special funds 137.28  
Trailer fees and permits 137.00  
Miscellaneous 395.01  
Repayment of loan - Water Department - 17,520.25
